

Open Technologies for Libraries

1pm Tuesday 14 August 2018

Jasper Hotel, 489 Elizabeth St, Melbourne

Koha library management system, the EBSCO Discovery Service Plugin, and more

An opportunity to hear about and discuss how open source software allows libraries the freedom and flexibility to share knowledge, innovate, and future-proof for the technology changes ahead. Catalyst and EBSCO will present some practical examples of where open source and vendor partnerships can provide libraries with an alternative way to use technology in delivering services to their customers.

Presented by Catalyst in partnership with EBSCO Information Services.

Agenda

1:00 Arrivals

1:15 – 2:15 Introduction to Koha, and the
benefits of open source software.

2:15 – 2:45 *Afternoon tea.*

2:45 – 4:15 EBSCO presents a range of marketing and technology
tools that drive traffic to your library and enable better
access and usage of a library's valuable collections.

4:15 – 5:00 Further discussion and networking.
